

# My Cheat Sheet

## What are cheat sheets?

Cheat sheets are probably a very unfair name for what are in fact reference cards or pages of information that you may use to remind yourself of everything from computer functions to specific dates. We use them extensively for revision as well as helping us to undertake tasks such as creating a finance spreadsheet. These cheat sheets will contain all of the information that we may require to remember to get the work done or the information that we are most likely to forget.

## Why do you need cheat sheets?

It is not cheating to use cheat sheets, unless you actually take them into an exam with you when you shouldn't. These sheets will help you to have quick access to all of the information that you may need without having to leaf through many different books and your notes to find what you need. These reference sheets will help you save a huge amount of time and will also help you to memorize information that you would otherwise forget. Downloading our easy to use sheets will help you to get the work done more efficiently and make fewer mistakes.
